

WML offers a specialist Ballistic Protection Containment Consultancy design service which allows full inclusion of ballistic protection and structural solution to produce seamlessly integrated designs.

To ensure that the design is fully compliant whilst still being economic, we understand that it is important to fully understand the Client's training requirements and we use our experience and knowledge to make certain the design meets all aspects of the brief.

West Midlands Police Internal 25m ranges

WML are TAS (Armed Forces Technical Advisory Source) accredited and can offer a range of services to suit each Client's bespoke requirements:

- Stand alone ballistic design consultancy to design and advise on the construction of new internal and external ranges and training facilities
- Work with our Design Partners (Architects, Service Engineer Consultants, Cost Consultants and Acoustic Consultants) to provide detailed building solutions for ranges, training facilities and ancillary accommodation
- Act as ballistic design consultants to a Client's team or Design and Build Contractor
- In addition WML partner with a Ballistic Fit out Contractor to provide a turn key solution for range refurbishment
- Offer advice on target systems, bullet traps, ballistic and acoustic materials

Projects can be undertaken from feasibility design, through planning and detailed design up to supervision of construction. All schemes are JSP403, College of Policing and Home Office
